BlueWater Diagnostic Laboratory

BlueWater Diagnostic Laboratory is set up to do drive up COVID-19 testing here at the Bullitt County Health Department (181 Lees Valley Road, Shepherdsville, KY). Testing requires a physician order and an appointment, so you must have your physician request a test through BlueWater Diagnostic’s portal.

If you do not have a medical home and think you need testing for COVID-19, you can do a telemedicine visit (Monday-Friday from 9:00AM-4:00PM) with Bullitt County Family Practitioners by clicking on this link https://Doxy.me/arla (open in Chrome or Firefox browser) and follow instructions listed in the digital waiting room.

You can also call Bullitt County Family Practitioners at 502-955-8480 if you have any questions.
